

WORDS OF WISDOM FROM CURRENT YEAR 12 TO FUTURE YEAR 12

Make flashcards/revision resources as you go, and complete assignments as you get them

Make good use of free periods during the day doing your assignments in them will save so much time before and after college

Have fun in year 12, enjoy it whilst its not unbelievably stressful

All A-Level subjects may feel daunting, uncomfortable or not what you expected at first but it does get better.

DONT USE THE LIFT YOU WILL GET STUCK!!!!

being able to manage your time will make your college experience more enjoyable

Rus is the best!

it only gets better (i think)

Don't leave assignments for the last week. Do them as soon as you get them

enjoy your time at s6c because after you actually have to be an adult

cram studying works in GCSES - BUT IT DOES NOT WORK FOR A LEVELS WHATSOEVER. START REVISING ASAP don't leave till end of the year :')

dont use the lift

You've got this

know what works for you for revision, and don't feel like there's one way you have to do things
