insurance
Cost Benefit Analysis

Entry Requirements

Minimum 5 GCSEs at Grade 4 or above
Including at least grade 5 in Maths

Course Description

Are you interested in taking Maths further than GCSE but not sure A Level Maths is the right choice? Perhaps looking for some maths content to help support other subject areas but do not want to study an entire A Level? Then Core Maths might be the option you are looking for.

New at S6C for Year 12s in September 2021, Core Maths is the bridge between GCSE and Level 3. The course is aimed at students who have achieved at least a grade 5 in GCSE Maths and want to continue with the subject but may not have met entry requirements for A Level Maths.

The content is based around the new GCSE Maths Higher Tier with around 20% taken from other specifications, for example A Level Maths. You will achieve a Level 3 qualification that is worth the same as an AS subject (in terms of UCAS points). Chemistry and Physics if you are not planning to study A Level Maths.

"I'm finding core maths a good and helpful subject as it's allowing me to take maths without taking the full course. The lessons are engaging and I find the topics interesting."
