Promoting positive behaviour and many more...

Entry Requirements

Minimum 5 GCSEs at Grade 4 or above

Course Description

The health and social care industry is one of the fastest growing in the UK – people are living longer and there is an increasing need for care and support as well as working with children in early years. By studying Health and Social Care you will learn how to help others improve their physical health and impact the wellbeing of people in your community as well as developing skills in working with young children. If you want to help make a positive difference to people's lives then Health and Social Care is the course for you.

In the first year you will study the Certificate and on successful completion you will continue onto the second year to complete the Extended Certificate or the Extended Diploma. You will develop professional and personal skills to allow you to offer specific, person-centred care and support and build positive relationships with the people you are working with, so that their needs and requirements are met while they maintain control of their own care and support.

"It is an interesting and enjoyable course that covers a wide range of topics"
